

F194/U Bandpass Filter

06/01/2014 14:04:47 UTC

This is a military surplus bandpass filter that covers **142 to 163 MHz**. It's pretty small and is convenient when you need moderate Q in the VHF band range. **Insertion loss (144MHz) is about 0.5 dB**, and the **3 dB bandwidth is about 4 MHz**. This is the plot from an Agilent 8712ES network Analyzer shows the filter tuned to the NOAA weather channel range.

Il mio filtro - Regolazione a **144.300 MHz** sotto network Analyzer **HP141T**

F-194/U
Band filter / 142-163MHz
